NATIONAL FOREWORD

(Adoption clause will be added later)

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'; and
- Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards which are to be substituted in their respective places are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 719 Glass — Hydrolytic resistance of glass grains at 98 °C — Method of test and classification	IS 2303 (Part 1/Sec 1) : 2021/ISO 719 : 2020 Grading glass for alkalinity: Part 1 Hydrolytic resistance of glass grains Section 1 Determination and classification of hydrolytic resistance at 98 °C (<i>third revision</i>)	Identical

ISO 720 Glass — Hydrolytic resistance of glass grains at 121 °C — Method of test and classification	IS 2303 (Part 1/Sec 2) : 2021/ISO 720 : 2020 Grading glass for alkalinity: Part 1 Hydrolytic resistance of glass grains Section 2 Determination and classification of hydrolytic resistance at 121 °C (<i>third revision</i>)	Identical
ISO 1101 Geometrical Product Specifications (GPS) — Geometrical tolerancing — Tolerances of form, orientation, location and run-out	IS 8000 (Part 1) : 2019/ISO 1101 : 2017 Geometrical product specifications (GPS) — Geometrical tolerancing: Part 1 Tolerances of form, orientation, location and run-out (<i>second revision</i>)	Identical
ISO 7459 : 2004 Glass containers — Thermal shock resistance and thermal shock endurance — Test methods	IS 11930 : 2018/ISO 7459 : 2004 Glass containers — Thermal shock resistance and thermal shock endurance — Test methods (<i>first revision</i>)	Identical
ISO 8113 : 2004 Glass containers — Resistance to vertical load — Test method	IS 11539 : 2018/ISO 8113 : 2004 Method of vertical load test for glass containers (<i>first revision</i>)	Identical

The Committee responsible for the preparation of this standard has reviewed the provisions of the following International Standards referred in this adopted standard and has decided that they are acceptable for use in conjunction with this standard:

<i>International Standard/ Other Publication</i>	<i>Title</i>
ISO 4802-1	Glassware — Hydrolytic resistance of the interior surfaces of glass containers — Part 1: Determination by titration method and classification
ISO 4802-2	Glassware — Hydrolytic resistance of the interior surfaces of glass containers — Part 2: Determination by flame spectrometry and classification

This standard includes modification of cross reference from ISO 719 : 1985 to ISO 719. Wherever reference to ISO 719 : 1985 occurs in the text, ISO 719 has to be substituted.

This standard includes modification of cross reference from ISO 720 : 1985 to ISO 720. Wherever reference to ISO 720 : 1985 occurs in the text, ISO 720 has to be substituted.

This standard includes modification of cross reference from ISO 1101 : 2004 to ISO 1101. Wherever reference to ISO 1101 : 2004 occurs in the text, ISO 1101 has to be substituted.

This standard includes modification of cross reference from ISO 4802-1 : 1988 to ISO 4802-1. Wherever reference to ISO 4802-1 : 1988 occurs in the text, ISO 4802-1 has to be substituted.

This standard includes modification of cross reference from ISO 4802-2 : 1988 to ISO 4802-2. Wherever reference to ISO 4802-2 : 1988 occurs in the text, ISO 4802-2 has to be substituted.

This standard also makes a reference to the BIS Certification Marking of the product. Details of which is given in National Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*second revision*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NATIONAL ANNEX A
(National Foreword)

A-1 BIS CERTIFICATION MARKING

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act, 2016* and the Rules and Regulations framed thereunder, and the product(s) may be marked with the Standard Mark.

Scope

This part of ISO 11418 specifies the design, dimensions, material and requirements of tablet glass bottles. Tablet glass bottles are applicable to primary packs used in direct contact with a drug.

This part of ISO 11418 is applicable to tablet glass bottles used in pharmacy. Together with the corresponding closure systems, they serve for packaging of pharmaceutical preparations in solid and liquid dosage forms which are not intended for parenteral use.

NOTE The potency, purity, stability and safety of a drug during its manufacture and storage can be strongly affected by the nature and performance of the primary pack.

The technical content of the document has not been enclosed as it is identical with the corresponding ISO standard. For details, please refer to ISO 11418-4 : 2005 or kindly contact:
