NATIONAL FOREWORD

(Adoption clause will be added later)

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'; and
- Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards which are to be substituted in their respective places are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 719 Glass — Hydrolytic resistance of glass grains at 98 °C — Method of test and classification	IS 2303 (Part 1/Sec 1) : 2021/ISO 719 : 2020 Grading glass for alkalinity: Part 1 Hydrolytic resistance of glass grains Section 1 Determination and classification of hydrolytic resistance at 98 °C (<i>third revision</i>)	Identical

ISO 720 Glass — Hydrolytic resistance of glass grains at 121 °C — Method of test and classification	IS 2303 (Part 1/Sec 2) : 2021/ISO 720 : 2020 Grading glass for alkalinity: Part 1 Hydrolytic resistance of glass grains Section 2 Determination and classification of hydrolytic resistance at 121 °C (<i>third revision</i>)	Identical
ISO 11607-1 Packaging for terminally sterilized medical devices — Part 1: Requirements for materials, sterile barrier systems and packaging systems	IS/ISO 11607-1 : 2019 Packaging for terminally sterilized medical devices: Part 1 Requirements for materials, sterile barrier systems and packaging systems (<i>first revision</i>)	Identical
ISO 11607-2 Packaging for terminally sterilized medical devices — Part 2: Validation requirements for forming, sealing and assembly processes	IS/ISO 11607-2 : 2019 Packaging for terminally sterilized medical devices: Part 2 Validation requirements for forming, sealing and assembly processes (<i>first revision</i>)	Identical

The Committee responsible for the preparation of this standard has reviewed the provisions of the following International Standards referred in this adopted standard and has decided that they are acceptable for use in conjunction with this standard:

<i>International Standard/ Other Publication</i>	<i>Title</i>
ISO 4802-1	Glassware — Hydrolytic resistance of the interior surfaces of glass containers — Part 1: Determination by titration method and classification
ISO 4802-2	Glassware — Hydrolytic resistance of the interior surfaces of glass containers — Part 2: Determination by flame spectrometry and classification

This standard also makes a reference to the BIS Certification Marking of the product. Details of which is given in National Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NATIONAL ANNEX A (National Foreword)

A-1 BIS CERTIFICATION MARKING

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act*, 2016 and the Rules and Regulations framed thereunder, and the product(s) may be marked with the Standard Mark.

Scope

This document specifies the shape, dimensions, fill capacities and performance requirements of moulded glass bottles for metering pumps. It also specifies the material for the manufacturing of such containers as well as the secondary packaging.

This document also provides requirements for packaging of the moulded glass bottles and addresses nonsterile, ready to sterilize or sterile as three possible options.

This document is applicable to colourless or amber glass containers moulded from borosilicate or soda-lime-silica glass and intended to be used in the packaging, storage or transportation of products intended for medicinal use.

The technical content of the document has not been enclosed as it is identical with the corresponding ISO standard. For details, please refer to ISO 24166-2 : 2022 or kindly contact:
