NATIONAL FOREWORD

(Adoption clause will be added later)

This standard was first published in 2024 and was identical to ISO 15747 : 2018 ‘Plastic containers for intravenous injections’. This revision has been brought out to align it with the latest version of ISO 15747 : 2026.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’; and
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards which are to be substituted in their respective places are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 2768-1 General tolerances — Part 1: Tolerances for linear and angular dimensions without	IS 2102 (Part 1) : 1993/ISO 2768-1 : 1989 General tolerances: Part 1 Tolerances for linear and angular dimensions	Identical

individual tolerance indications	without individual tolerance indications (<i>third revision</i>)	
ISO 8536-4 Infusion equipment for medical use — Part 4: Infusion sets for single use, gravity feed	IS/ISO 8536-4 : 2019 Infusion equipment for medical use: Part 4 Infusion sets for single use, gravity feed	Identical
ISO 10993-5 Biological evaluation of medical devices — Part 5: Tests for in vitro cytotoxicity	IS/ISO 10993-5 : 2009 Biological evaluation of medical devices: Part 5 Tests for in vitro cytotoxicity	Identical
ISO 22081 Geometrical product specifications (GPS) — Geometrical tolerancing — General geometrical specifications and general size specifications	IS 17894 : 2022/ISO 22081 : 2021 Geometrical product specifications (GPS) — Geometrical tolerancing — General geometrical specifications and general size specifications	Identical

The Committee responsible for the preparation of this standard has reviewed the provisions of the following International Standards referred in this adopted standard and has decided that they are acceptable for use in conjunction with this standard:

<i>International Standard/ Other Publication</i>	<i>Title</i>
ISO 10993-1	Biological evaluation of medical devices — Part 1: Requirements and general principles for the evaluation of biological safety within a risk management process
ISO 15510	Stainless steels — Chemical composition

This standard also makes a reference to the BIS Certification Marking of the product. Details of which is given in National Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NATIONAL ANNEX A
(National Foreword)

A-1 BIS CERTIFICATION MARKING

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act, 2016* and the Rules and Regulations framed thereunder, and the product(s) may be marked with the Standard Mark.

Scope

This document specifies requirements to the safe handling and the physical, chemical and biological testing of plastic containers for parenterals.

This document is applicable to plastic containers for parenterals having one or more chambers and having a total nominal capacity in the range of 50 ml to 5 000 ml such as film bags or blow-moulded plastic bottles for direct administration of infusion (injection) solutions.

NOTE 1 In some countries, national or regional pharmacopoeias or other government regulations are legally binding, and these requirements take precedence over this document.

The technical content of the document has not been enclosed as it is identical with the corresponding ISO standard. For details, please refer to ISO 15747 : 2026 or kindly contact:
